1. What/Why React?

1.1 Technology: **Hook vs Class** components

Function component (short)/ class component (clear-long)

1.2 Setup Environment

2. Creating a React Application - Hello world

3. Components & Templates

4. Dynamic Values in Templates

5. Multiple Components (root)

6. Adding styles

7. Events

8. Using State (useState hook)

9. React Dev Tools

10. Outputting Lists

11. Props

12. Reusing Components

13. Functions as Props

14. UseEffect Hook basic

14.1 UseEffect dependencies

15. Using JSON Server

16. Fetching data with useEffect

17. Conditional Loading Message

18. Handling Fetching Errors

19. Making a Custom Hook

19.1 Recap

20. The React Router

21. Exact Match Routes/Links/Active Tabs

22. useEffect Cleanup

23. Route Parameters

24. Programmatic Redirects

25. Reusing Custom Hooks

26. Controlled Inputs Forms
