1. **Why React ?**

2. **Class** vs Hook (function component). **Redux** vs Context API ?

3. **Setup env**

3.1 **Hello world with React**

3.2 **Source code on Github**

3.3 **Structure React Project**

4. **React components**

5. **State**

6. **React dev tool**

7. **DOM Events**

8. **Changing State**

9. **Intro to Forms**

10. **Nesting components**

11. **Props**

12. **Outputting Lists**

13. **Stateless/StateFull Components (Function/Class Components)**

14. **Conditional Output**

15. **Split Components**

16. **Functions as props**

17. **Deleting data**

18. **Recap & Virtual DOM**

19. **CSS Files**

20. **Lifecycle Methods**

21. **To Do Apps (CRUD - create/read/update/delete)**

21.1 **Create/Read data todos**

21.2 **Update/Delete todo**

22. **The react routers**

23. **Links & NavLinks**

24. **Redirect**

25. **Higher Order Components**

26. **Using axios**

27. **Route parameters**

28. **Switch tags**

29. **Importings images**
